

## Cut Energy Waste, Save Money, and Help Sysco Achieve its GHG Emissions Goals Along the Way

Back in 2006, Sysco teamed up with Cascade Energy to implement an energy management program across their network of distribution centers. Sysco has achieved incredible results, cutting the energy intensity of their distribution centers in half, saving over \$300M in energy costs, and eliminating millions of tons of GHG emissions along the way.

 **Energy Intensity Reduced**  
**-50%**

 **\$316.5 m**  
In Avoided Costs

 **Energy Management Programs In**  
**143**  
Facilities

Sysco has set ambitious new emissions goals and the only way to achieve them is with help from its suppliers. Sysco needs its suppliers – it needs you – to eliminate energy waste from your operation. You will save money, lower your GHG footprint, and increase the value you provide to Sysco.

Cascade Energy has a proven process for eliminating energy waste in your facilities. It worked for Sysco and it will work for you.

Sysco needs suppliers to take meaningful action to cut their GHG emissions. Do you have a plan? Do you want a plan? Contact Cascade Energy, they will help you get there.

## + Increase Your Competitive Advantage

- Realize significant energy and cost savings
- Leverage technical expertise to focus on the right investments
